

### What is SPRS?

# Supplier Performance Risk System

- "... the authoritative source to retrieve supplier and product PI [performance inf ormation] assessments for the DoD [Department of Defense] acquisition community to use in identifying, assessing, and monitoring unclassified performance." (DoDI 5000.79)
- Vendor Performance
  - Quality Classifications & On-time Delivery scores by FSC/PSC/NAICS
  - Supplier, Price and Item Risk assessments; Market Research, Supplier Surveillance tools
- Vendor Compliance
  - Debarments/exclusions, § 889, FASCA, representations/certifications (from SAM)
  - NIST SP 800-171 Cybersecurity Assessments, NSS Restricted List, Vendor Threat Mitigation/§ 841
- Supply Chain Illumination (Enhanced Vendor Profile)

#### UNCLASSIFIED

-----> automated manual

### **SPRS Data Flow**

### How does SPRS work?

### **Quality and Delivery Scores**

Collects quality and delivery data to calculate delivery scores and quality classifications.

### Price Risk

Identifies whether a proposed price is consistent with historical prices paid for that item and is depicted by high, low or within range.

Average Price based on unit prices since 2010, adjusted for inflation using Producer Price Index Updated daily

### Item Risk

Flags items identified as high risk by services/agencies.

Based on criticality of use and history of counterfeiting or non-conformance.

Updated as required by DoD services or agencies

# SPRS Data Processing

### Supplier Risk

A computer algorithm uses 10 factors of past performance information to calculate the Supplier Risk Score. These factors are individually weighted (based on age and relative importance) and summed to produce a numerical and color score for every company which has either a contract or factor data within the last three years.

Score based on daily weighted sum of supplier performance factors adjusted for number of base contracts

### Delivery Scores & Quality Classifications

By CAGE and Commodity (FSC/PSC or NAICS) Updated daily, 14-day review, or Challenge period

# SPRS Color Legend

SPRS uses colors to identify percentage groups based on a standard bell curve statistical distribution. Vendor's scores for quality and supplier risk are ranked, plotted and assigned a color for quick reference. In addition to these rankings, Black is used to identify there is no score (no data) and grey is used when a vendor has been excluded.

SPRS COLOR LEGEND					
Top 5%:	BLUE				
Next 10%:	PURPLE				
Next 70%:	GREEN				
Next 10%:	YELLOW				
Lowest 5%:	RED				
No Scorable Data:	WHITE(*)				
Scorable Data Pending:	GREEN(*)				
Vendor Excluded:	GREY				
No Score:	BLACK

# Section 841 Identifications List & Vendor Threat Mitigation

### Section 841 Identifications List

Provides SPRS government users and up-to-date list of vendors that have active identifications under FY15 NDAA Sec 841.

### **VTM**

The process to assess and mitigate risks posed by vendors supporting DoD operations outside the United States. Previously referred to as "Vendor Vetting", VTM leverages all-source information and combatant commander guidance to identify vendors supporting the adversary and authorizes heads of contracting activity to restrict, terminate, or void award to them.

### Section 841 Identifications List

#### SECTION 841 IDENTIFICATIONS LIST

Please note that there may be delays in updating this module with accurate information on identifications or annual reviews. To see a full list of vendors that have been identified under Sec 841 authority, please use the VTM Module's Risk Rating Search.

The Vendor Threat Mitigation (VTM) Module on SPRS provides acquisition professionals with visibility of vendor threat vetting outcomes under AFRICOM and CENTCOM VTM programs. The Section 841 list is a compilation of vendors and related entities that have been identified under the FY2015 NDAA Section 841. Please contact the corresponding vendor vetting program before pursuing business with these entities.

If an entity has been excluded by a Head of Contracting Activity (HCA) in the System for Award Management (SAM), the "SAM Exclusion" (Y/N) will have a 'Y' value. Contracting Officers should check with their respective HCA and requirement owner before using any entity with an 'N' value in order to assess and mitigate risk. If you would like to view corresponding Section 841 memos, please visit the VTM Intelink website (https://intelshare.intelink.gov/sites/atlcoi/vtm/Sites/adeci/vtm/Sites/adeci/vtm/Sites/atlcoi/vtm/Sites/adeci/vtm/Sites/

### Solicitation Inquiry

### SOLICITATION INQUIRY REPORT

Print

Source Selection Sensitive Information, See FAR 2.101, 3.104, and 42.1503

### Instructions:

- 1. Enter a unique PO/Solicitation Number
- 2. Enter one or more CAGE/UEI and Supply Codes. Multiple CAGE Codes need to be separated by a colon.
- 3. After Cages Codes are entered, select Add CAGE button to add Cage Codes.
- 4. If a UEI number/letter sequence is added, select ADD UEI button to add UEI.

### Instructions for Standard Assessment:

- 5. Select Standard Assessment button to view the requested information.
- 6. Contract award can be acknowledged by checking the award checkbox adjacent to the CAGE Code. To save solicitation inquiry to history, select Save With Award. The inquiry information will then be saved to the user solicitation history.
- 7. To save solicitation inquiry without award, select Save Without Award. The inquiry information will be saved to the user solicitation history file.

### Instructions For Best Value

- 5. Select Best Value Assessment button.
- 6. Use default values (each value weighted 1/3) or edit quality, delivery and cost values (must total 100%).
- Enter Vendor bid value amounts.
- 8. Select Calculate Best Value button to view requested information.
- 9. Contract award can be acknowledged by checking the award checkbox adjacent to the CAGE Code. To save solicitation inquiry to history, select Save With Award. The inquiry information will then be saved to the user solicitation history file.
- 10. Best Value Inquiries are automatically saved without award.

Notes: (M) Indicates Mandatory Field.

Display All Relationships

The term 'Supply Code' refers to a part or product reference code. This code could be either an FSC/PSC (Federal Supply Code/Product Service Code) or a NAICS (North American Industry Classification System).

FSC/PSC codes are used by government buying offices to classify and identify the products, supplies, and services that the government uses and buys.

NAICS codes identify products and services by type of industry and are used by the government to evaluate economic performance.

There is thus a relationship between FSC/PSC and NAICS codes. One FSC/PSC code might relate to one or many NAICS codes that describe the same part or product.

For example, FSC/PSC 1620 may only have a relationship to one NAICS code 336413

FSC/PSC 1620: A/C LAND GR CP

NAICS 336413: OTHER AIRCRAFT PART AND AUXILIARY EQUIPMENT MANUFACTURING

Whereas FSC/PSC 2420 has 3 related NAICS codes: 332439, 332999, 333924

FSC/PSC 2420: TRACT WHLD

NAICS 332439: OTHER METAL CONTAINER MANUFACTURING

FSC/PSC 2420: TRACT WHLD

NAICS 332999: ALL OTHER MISCELLANEOUS FABRICATED METAL PRODUCT MANUFACTURING

FSC/PSC 2420: TRACT WHLD

NAICS 333924: INDUSTRIAL TRUCK, TRACTOR, TRAILER, AND STACKER MACHINERY MANUFACTURING

If you look at the descriptions, you'll see that they are all describing a single part or product, not 3 or 4 different parts or products.

Because part and product performance metric data is collected by SPRS from many different sources, products can potentially be referenced by both their FSC/PSC and NAICS designations.

Thus, in the reporting of contractor performance on FSC/PSC 2420, for example, SPRS must consider any reports submitted under corresponding NAICS codes of 332439, 332999, and 333924.

NOTE: The scoring, however, is not being done on 3 or 4 parts or products, but only on a single part or product.

### Watch Tutorial

This tutorial is a step-by-step guide for Affirming Officials (AO) to affirm Cybersecurity Maturity Model Certification (CMMC) for all levels.

Print Presentation

Supplier Performance Risk System (SPRS) "...is the authoritative source to retrieve supplier and product PI [performance information] assessments for the DOD [Department of Defense] acquisition community to use in identifying, assessing, and monitoring unclassified performance." (DoDI 5000.79)

SPRS supports DoD Acquisition Professionals with meeting acquisition regulatory and policy requirements by providing:

- Price, Item and Supplier procurement risk data and assessments (DFARS 204.76)
- · On-time delivery scores and quality classifications
- Market Research tool
- . Company exclusion status (debarments, suspensions, e
- NIST SP 800-171 Assessment re
